

## UNIVERSAL INPUT

## FEATURES

- 85 to 264 VAC universal input
- Power Fail Detect (PFD) Signal
- Input surge current protection
- Overvoltage \& overcurrent protection
- Open PCB, L-bracket or enclosed option
- 100\% burn-in
- UL/CSA/TÜV approved \& CE marked to LVD

## DESCRIPTION

The SU110P series of compact, open PCB constructed, ACDC switching power supplies are capable of delivering 110 watts of continuous power at 25 CFM forced air cooling or 80 watts at convection cooling. They operate at 85 to 264 VDC input voltage without the need of a selector strap. They are ideally suited for use in small to medium size digitally-based systems, such as point-of-sale equipment, microprocessor based systems and telecom equipment. All models meet the safety requirements of UL, CSA and IEC.

Notes: (1) Peak output current with $10 \%$ maximum duty cycle for less than 60 seconds. Total peak power must not exceed 130 watts.
(2) 110 watts maximum at 25 CFM forced air cooling or 80 watts maximum at convection cooling, except model SU110P10-1 which is rated maximum 60 watt convection cooling or 72 W at 25 CFM forced air cooling.
(3) Safety agency approvals are for the above listed models in PCB format. To order a model with a metallic L-bracket or box, add suffix "B" for L-bracket format or "C" for enclosed format e.g., SU110P45C.
(4) The output \#1 of model SU110P45-1 needs a minimum current of 2A to support the other outputs at their maximum rated loads.

## MECHANICAL SPECIFICATIONS

## Notes:

1. Dimensions shown in inch (mm)
2. Tolerance $0.02(0.5)$ maximum
3. Input connector mates with Molex housing 09-503051 and Molex 2878 series crimp terminal
4. Output connector mates with Molex housing 09-503131 and Molex 2878 series crimp terminal
5. Weight: 640 grams (PCB format)
6. The copper pad of the mounting hole near P1 is for system grounding through a metallic stand-off to the system chassis.
